\* Most people with coronavirus have at least 1 of these symptoms:

• a high temperature (37.8°C or above. If you don't have a thermometer, feeling hot to the touch on your chest or back is a good indicator of a high temperature)

• a new, continuous cough (this means coughing a lot for more than an hour, or 3 or more coughing episodes in 24 hours. If you usually have a cough, it may be worse than usual)

• a loss or change to your sense of smell or taste
